YE "Invest in YOUTH"

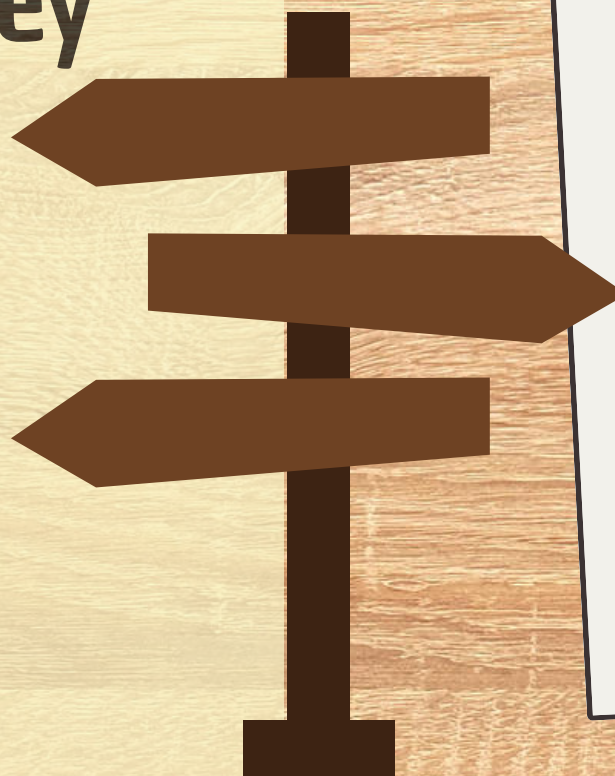

Invest in YOUTH
ERASMUS+

An adventure like this doesn't need a table of contents.

An unexpected journey let the feelings speak.

About the topics of the project

- Financial strategies
- History of money
- Well being
- Intercultural exchange

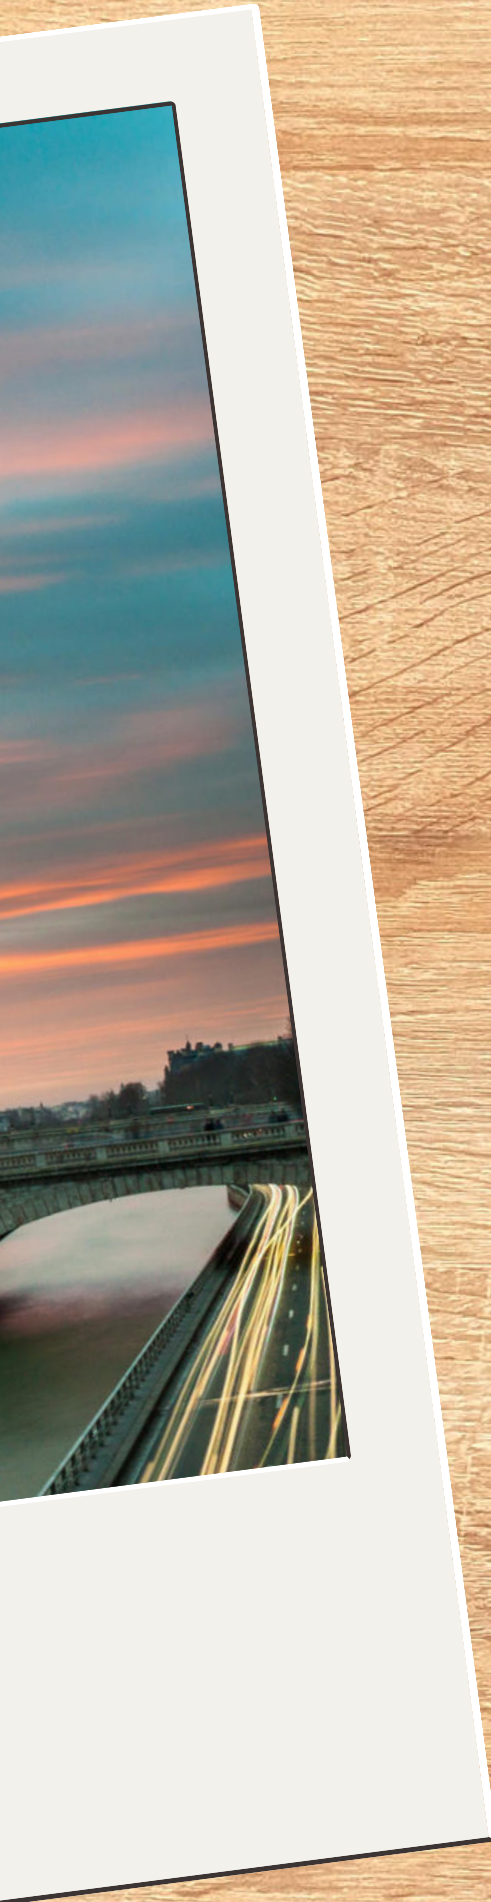

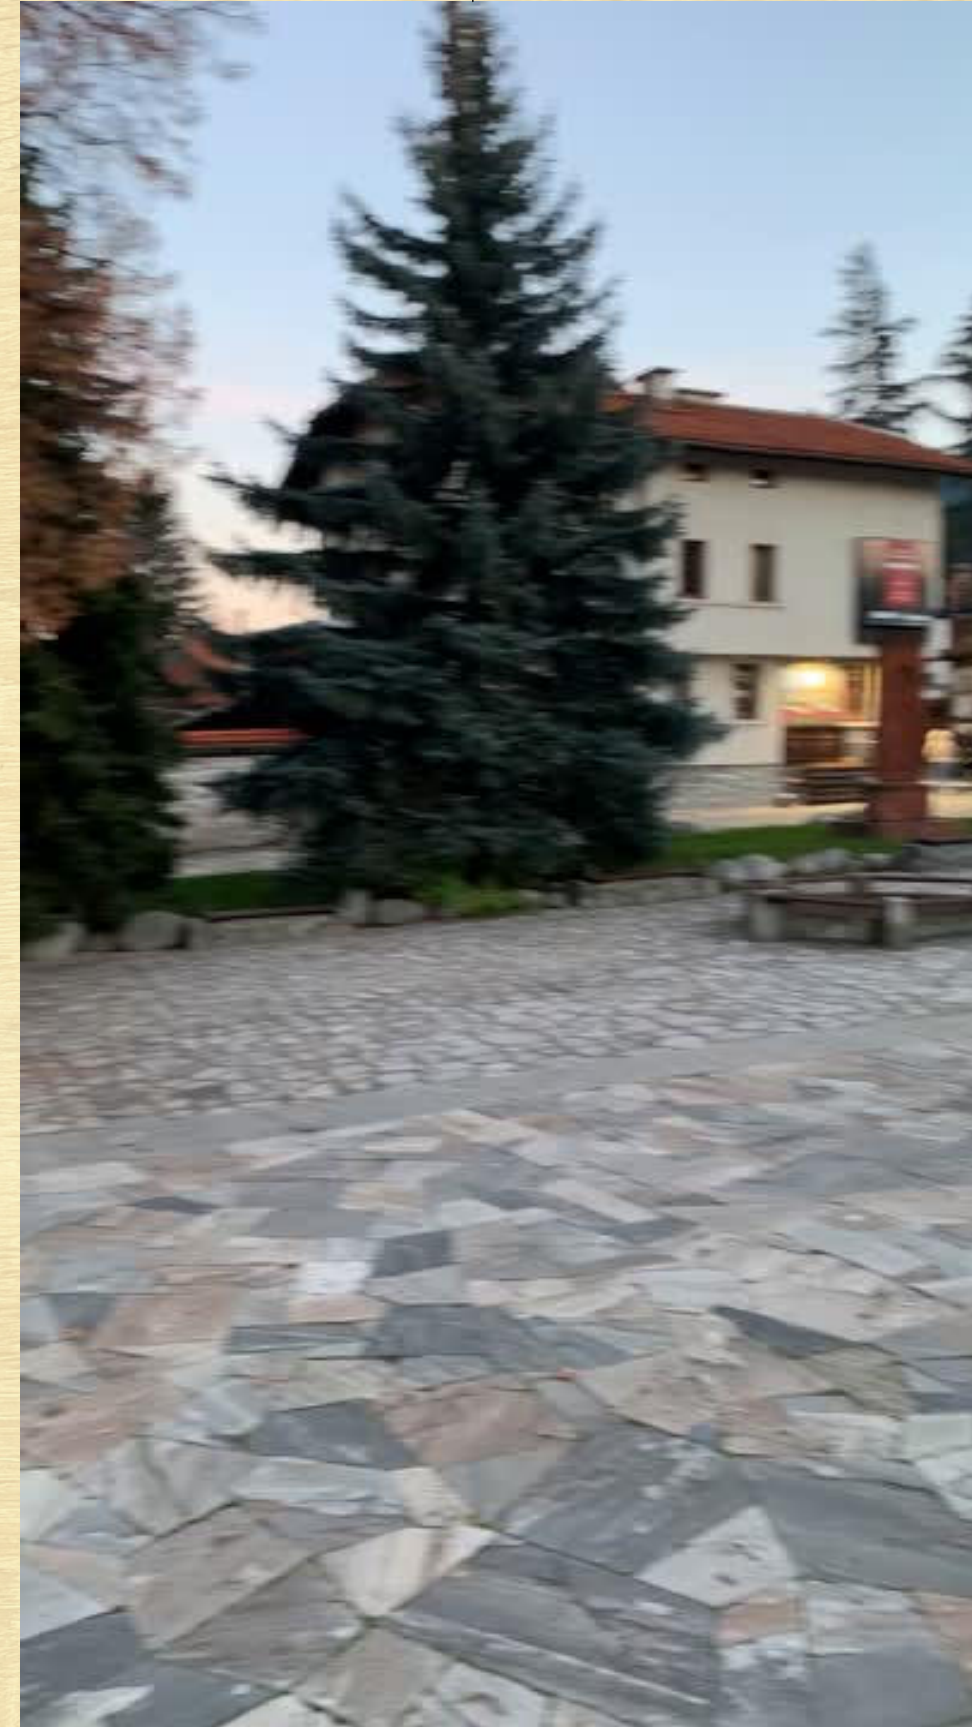

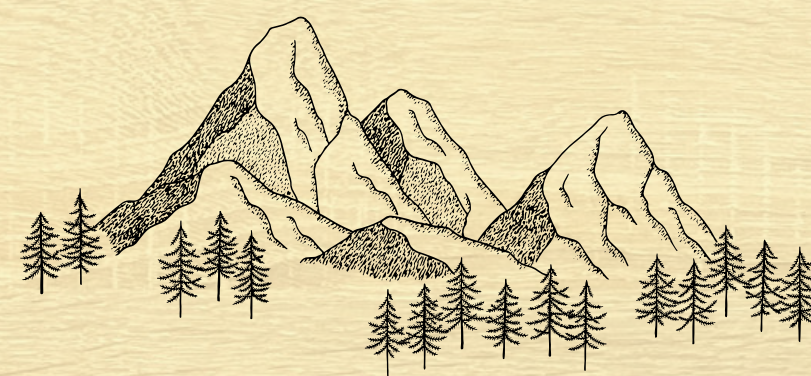

First feelings about Bansko

A town surrounded by mountains and cold temperatures... but also full of streets and monuments like these.

It was like to live in a fable for ten days

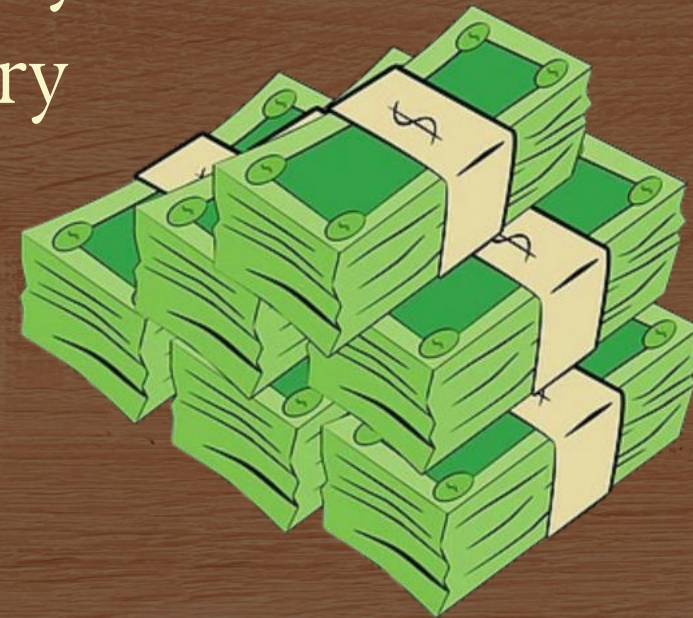

unfortunately the people are not so nice, specially with the italians

The value of money...and beyond

Thanks to this project, we discovered that money are not only about numbers, but, it's a full story about:

- how did they borned
- why do we use it
- how does moneys takes influence above our lives

and what about the stronger part?

“Realizing that the true value lies in how we use it, not in how much we have.”

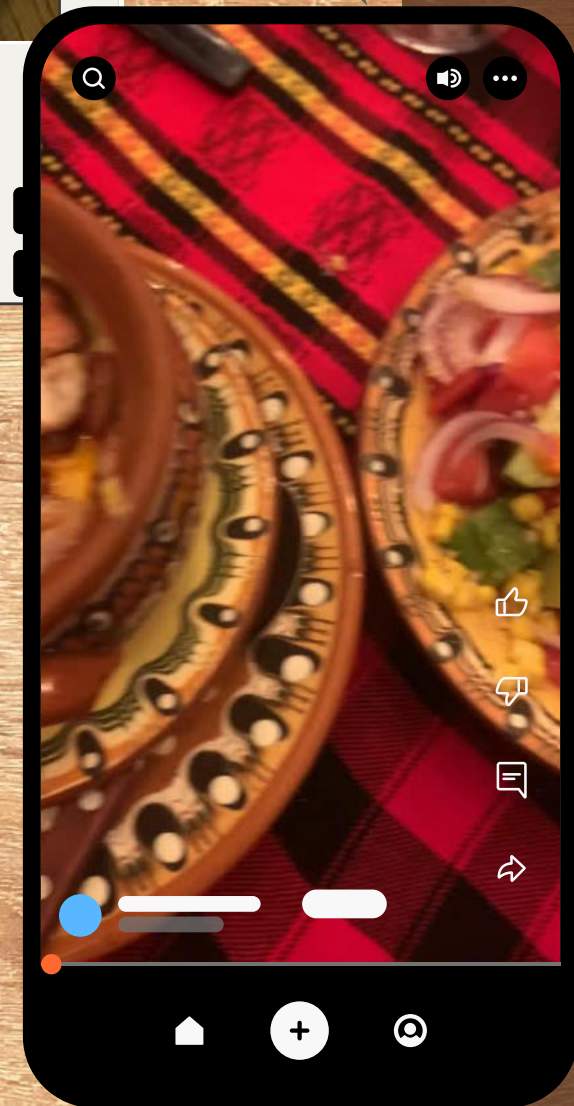

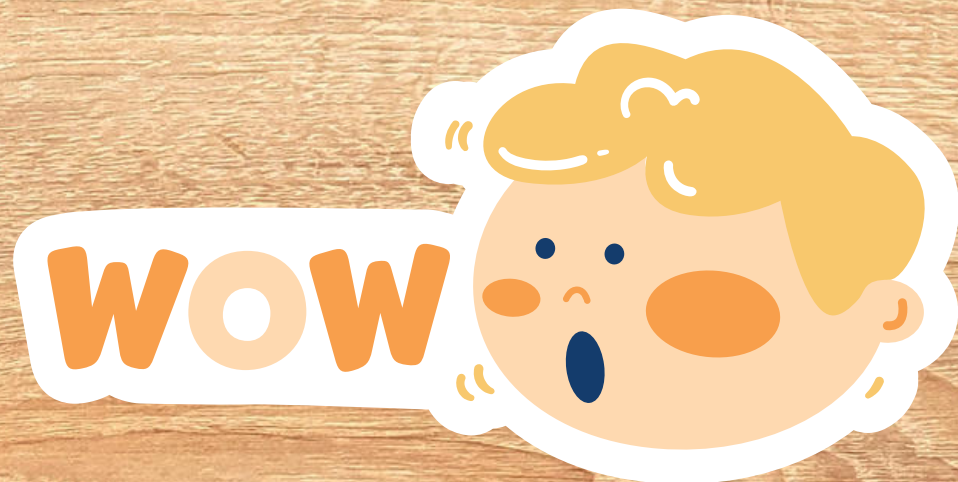

typical food

Not a real deal with the food of the hotel... they tried to make it international but the only thing we got in common with the other nations was the stomach pain

The real typical food that we ate in a bulgarian restaurant, instead of the hotel one, was AMAZING. It was like going to nonna's lunch and be cuddled in every moment, also with live music!

But now the real
question is...

What I learned?

- Self confidence by talking in front of people that I didn't meet before the project(also in another language).
- I've gained a solid understanding of how money works and how to save it effectively.
- I learned how to socialize and including also people that I didn't like them
- I discovered a way to learn things
- I've learned how to study in a way that's both enjoyable and effective, without ever feeling bored.

Grazie
